

STACS-UBIN

#STACS Is A Blockchain Technology Partner For Project Ubin Phase V

Allowing DvP fulfilment of different assets,
across different DLT technologies

STACS acts as the securities blockchain providing the digital securities leg of the transaction and is integrated with the Ubin Payments Network and its Singapore Central Bank Digital Currency

Achieves instant delivery of payments against securities

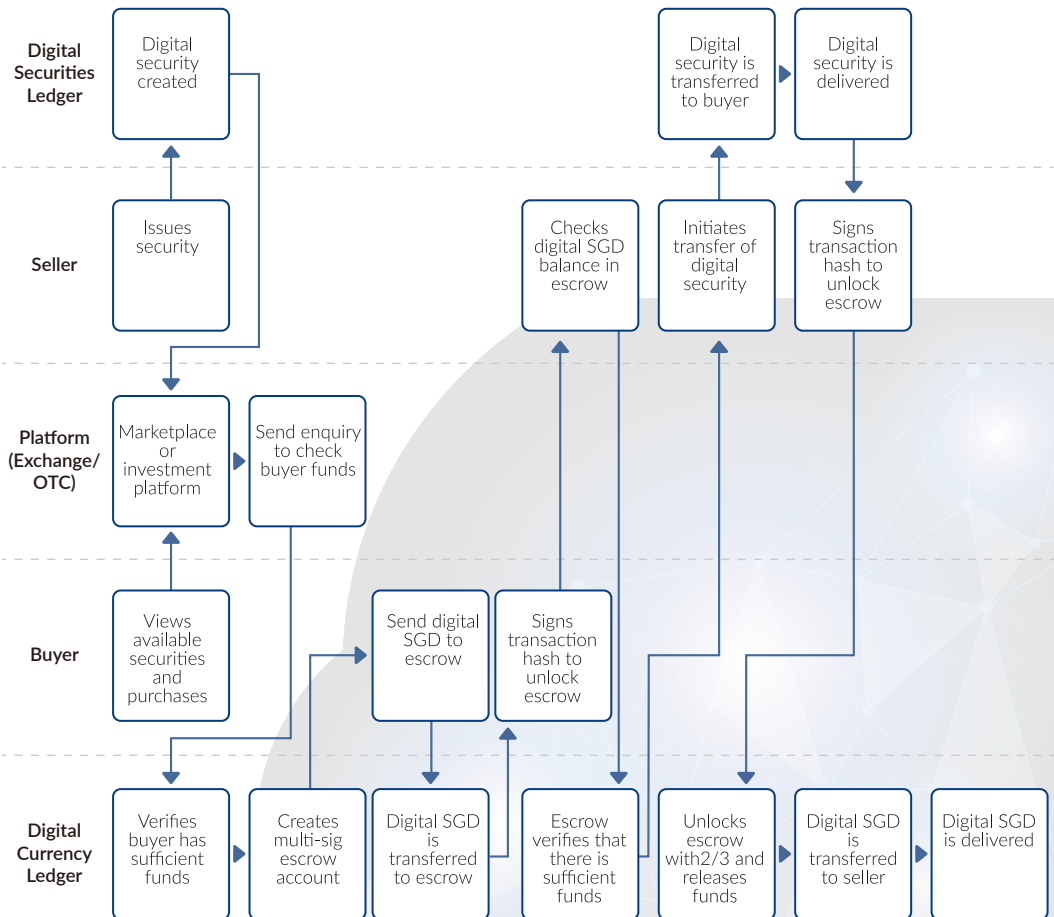

Market participants can move from DLT experimentation to commercial production

Integration with Project Ubin

On-Chain Delivery Vs Payments for Cash Against Securities

Ready To Deploy Today, Speak To Us Now

With several STACS networks already deployed, we believe in collaboration which will further industry participation in the digital securities space.
